Subject :HP 9000 S3/4/700 Applications

Grenoble, May 1993.

Dear Customer,

We are pleased to deliver the latest HP-UX software product updates to you on compact disc. The HP-UX software compact disc set consists of a number of individual CDs [Core OS, Application(s), Install, and Support]. From release to release, this is a cumulative set of software products. With this release and each subsequent release, **ONLY THOSE CDs IN THE SET WHICH HAVE CHANGED** are being provided. Accompanying these changed CDs are new, respective codewords; there is one unique codeword for the Core OS disc and Application disc(s) in the set. Your codewords for the changed discs are provided on the enclosed CD-ROM Certificate entitled "Codeword to Install Software".

Each new codeword will unlock all products on the corresponding CD (CORE OS or APPLICATION disc) that are covered by your Hewlett-Packard software support agreement.

If "NONE" is printed instead of a codeword, it means that either you do not have any product on the corresponding CD, or your product(s) on that CD are not encrypted (this is a normal situation). For this application release, if you receive an APPLICATION disc and no codeword certificate, this also indicates that you have not purchased support for the products on the CD.

With this approach of only supplying those discs which have changed in the disc set, you will continue to have access to the latest compact disc set while eliminating the needless supply and associated waste of unchanged materials. To ensure proper management of your disc set, **ONLY DISPOSE OF THOSE DISCS** for which a replacement is being supplied in this shipment. Should you wish to update your system to HP-UX 9.0 in the future, please retain your HP-UX 8.0X CD set.

P/N : 5961-8327

To assist in the management of your CD set, a list of CDs which together comprise the latest CD disc set follows:

	S300/400	S700
Core Operating System Disc	P/N: B2378-13622	B2826-13622
Application Disc(s)	P/N: B2378-87092	B2826-13634 B2826-13635
Installation Disc	P/N: B2378-13621	B2826-13621
Support Disc	P/N: N/A	B2826-13623

#### Increased HP-UX Application Product Volume

Due to increased HP-UX application product volume, you may receive in this shipment multiple application discs (for S700 and S800). You will receive one unique codeword for each CD. If you have products on both discs (1 of 1 and 2 of 2), then you must load the 1 of 2 disc first. However, if you only have applications on disc 2 of 2, then you may load disc 2 only. If codeword(s) have been provided on your "Codeword to Install Software" certificate, then you must load those discs. The "Codeword to Install Software" certificate references the correct CD part number(s) to assist you with your update.

#### Instant Ignition Plus

The Instant Ignition Plus software will be available on Instant Ignition systems and the Application CD. The Instant Ignition Plus is integrated within HP VUE. It consists of demos, games, customization tools, and new Motif interface for some existing applications. Once the Instant Ignition Plus has been installed on the system, users can explore the following toolboxes to find all the goodies:

- 1) General Toolbox for Fun\_and\_Games.
- 2) General Toolbox for System\_Admin (look for new icons and tools).
- 3) Marketplace Toolbox for Product Demos.

To install Ignition Plus, follow these steps :

- 1) Install the Applications CD.
- 2) Run /etc/update.
- 3) Select and load the IGNITION+ partition.
- 4) For German/Japanese systems edit /usr/vue/config/Xconfig to include:

```
Vuelogin*language:    german    or
Vuelogin*language:    japanese
```

To remove Ignition Plus, follow these steps :

- 1) Double click on System\_Admin in General Toolbox.
- 2) Double click on RemoveFilesets.
- 3) Press "Select Fileset" key on the partition IGNITION+.
- 4) Select the filesets you wish to remove.
- 5) Follow the instructions on screen.

\*\* Recommendation: Do not remove fileset I+CORE.

#### Additional Information

Attached are listings of the newly released and updated software products available on the APPLICATIONS disc. You can add software products from this list to your HP 9000 system, without having to repurchase the media. Simply contact your HP sales office to purchase the appropriate software product license required to use each product. You will receive a CD-ROM certificate that indicates how to obtain the codeword(s) to unlock the purchased software product(s) from these compact discs.

In response to your feedback regarding more information about your HP-UX application releases, additional information has been provided on the following topics:

- o Support Matrix
- o Future Application Products

Your Sincerely,

Alain Mey  
Marketing Communication Manager

SUPPORT MATRIX INCLUDED WITH YOUR SHIPMENT

The Support Matrix lists HP-UX application products that have been released since the introduction of HP-UX 9.0 operating system and are now available from Hewlett-Packard. The listing indicates what product version can be installed on a machine running a particular HP-UX operating system.

If a product is listed as "Supported" (S), then you may install that product version on the indicated HP-UX operating system. If the product is listed as "Not Supported" (NS), then it should not be installed on the indicated HP-UX operating release.

KEY: Release Media: Identifies which HP-UX Application Software CD a particular product/version was released

Base : HP-UX Release 8.07 or 9.0

Date : The Release Date on the CD

HP-OS Base : S = Supported, you may install that product and version on the indicated HP-UX Operating System

NS = Not Support, and should not be installed on the indicated HP-UX Operating System

#### FUTURE APPLICATION PRODUCTS

New HP-UX 9.0 versions of the following applications are under development and should be available in the coming months. Applications may be added or deleted from this list due to unanticipated events in the development process. HP will make every effort to release these products as quickly as possible, however, we are unable to specify in which month a particular application will become available. This is not a comprehensive list of all available applications, however, it does represent key product offerings.
